The ICC Price Action Playbook

Mastering Market Structure, Liquidity,
and the Art of the Continuation

The Anatomy of the Breakout Trap

RESISTANCE

KEY INSIGHT

This reversal feels personal, but it isn't. It is a calculated move. The market is purposely shaking out emotional traders to grab their liquidity before the real trend begins.

1 THE EXPLOSION:
Price rips upward.
The signal fire is lit.

2 THE HOOK:
You buy here
because you don't
want to miss the move
of a lifetime.

3 THE TRAP:
Price violently
reverses. Stop-losses
are triggered. You
become exit liquidity.

The Paradigm Shift: Clean Charts Only

THE NOISE

The Amateur

THE SIGNAL

The Professional

You don't need a crystal ball. You don't need a dozen indicators.
You only need to read the ongoing, raw battle between buyers and sellers.

Foundation 1: The Anatomy of a Trend

UPTREND

Higher Highs, Higher Lows

DOWNTREND

Lower Lows, Lower Highs

CONSOLIDATION

No Trade Zone

The market is either trending or breaking rules. If structure breaks, it's either reversing or stuck in consolidation. Rule #1: Never trade in a No-Trade Zone (Consolidation).

Foundation 2: Swings are Battlegrounds

THE CEILING (Swing High)

A ceiling of active **Sellers**. Below this level equals potential **bearishness**.

THE BRICK WALL (Swing Low)

A brick wall of active **Buyers**. Above this level equals potential **bullishness**.

Swing highs and lows aren't just lines—they are zones where money stepped in to **forcefully change** the market's direction.

The ICC Framework Synthesis

Step 1: Indication (The Explosion)

The Explosion

The Metaphor

An indication breaks a major swing level on the 1H/4H chart.

WARNING: This is information, not an entry signal.

Step 2: Correction (The Mess)

The Mess

The Metaphor

The Reality

The market requires capital to trend. The correction dips into the "liquidity pool" of trapped retail traders to grab the cash needed for the real move.

Step 3: Continuation (The Clean Up & Entry)

The Metaphor & Rules

Execution Rules

1. The mess is cleaned up.
2. Enter when structure shifts back in the direction of the Indication.
3. Target the high that originally started the correction.

The Reality

The Timeframe Multiplier (Diagnostic Matrix)

THE SATELLITE (1H / 4H Charts)	Function: Big picture mapping. Task: Finding the true trend, marking major Swing Highs/Lows, and waiting for the Indication.
THE MICROSCOPE (15m / 5m Charts)	Function: High-definition street-level view. Task: Monitoring the messy Correction, spotting the exact structure shift, and executing the Entry.

GOLDEN RULE: Every lower timeframe move must correlate with the higher timeframe boss.

Marking Up The Chart: A 4-Step Protocol

STEP 1: SCOPE THE HORIZON

Look back only 1 to 3 sessions (3 to 5 days max). Ignore ancient history.

STEP 2: DRAW THE BATTLEGROUND

Place simple gray boxes at the absolute highest and lowest swing points.

STEP 3: READ THE STRUCTURE

Is it making Higher Highs or Lower Lows? Identify the ongoing trend.

STEP 4: WAIT FOR THE BREAK

Do nothing until an Indication breaks one of your gray boxes.

Anatomy of a Perfect Setup

Psychology Matrix: Breakout vs. ICC Trader

THE BREAKOUT TRADER

Trigger: Driven by FOMO and Greed.

Action: Enters the market immediately on the initial explosion.

Result: Gets trapped by liquidity grabs, panic sells at the exact wrong moment.

THE ICC TRADER

Trigger: Driven by structure and patience.

Action: Views the explosion as raw information. Waits out the messy correction.

Result: Buys the continuation safely after retail stops are hunted.

The 3 Golden Rules of Execution

01

Trends Don't Pause Randomly

If a trend breaks structure, it's either reversing or correcting. It does not happen by accident. Pay attention to the clues.

02

Trade Volatility

Stop trading stagnant pairs. Focus on Gold, NASDAQ, and US30. Go where the volume is.

03

Live Screen Time > Backtesting

Backtesting removes the emotion of a live market. You must feel the pressure of real-time price action to truly adapt and build the skill.

YOUR_ENTRY

The market just showed you its cards.

Once you can see the plan, the only thing standing
between you and the trade is your own patience.
Stop predicting. **Wait for the Continuation.**
